General Instructions
SPSG Summer Math Reinforcement Packet
Created for Students Entering 5th Grade

Student's First Name: ___________________ Last Name: ___________________

Dear Students and Parents:

The purpose of summer work is to review important math concepts as you look forward to 5th grade next year. Following is a description of the two math packets that should be completed by all incoming 5th grade students. The work in these two packets will be checked for effort and completion by the end of the first week back in September. A deduction will be made for packets returned without parent signatures.

Packet 1 contains a variety of 50 problems intended to review concepts previously learned in 4th grade mathematics.

Packet 2 contains 50 drill worksheets intended to strengthen your knowledge of addition, subtraction, multiplication, and division.

Please follow this suggested strategy so you will be able to easily complete both packets by the end of the summer. (Use this handy checklist as you complete each week!)

___ Week 1: Complete 8 - 12 problems from packet 1.
___ Week 2: Complete 10 worksheets from packet 2.

___ Week 3: Complete 8 - 12 problems from packet 1.
___ Week 4: Complete 10 worksheets from packet 2.

___ Week 5: Complete 8 - 12 problems from packet 1.
___ Week 6: Complete 10 worksheets from packet 2.

___ Week 7: Complete 10 - 12 problems from packet 1.
___ Week 8: Complete 10 worksheets from packet 2.

___ Week 9: Complete the remaining problems from packet 1.
___ Week 10: Complete 10 worksheets from packet 2.

IMPORTANT: Multiplication and division facts from 2 - 11 should be fully memorized by the beginning of 5th grade. Fully memorized means that you do not need to use your fingers, count up or down, or rely on special tricks to multiply and divide whole numbers from 0 - 11. Many of you may already know your 12 facts, too! Congratulations!!!

The work in this packet was completed independently by my daughter. Hints from parents and tutors are okay.
